

Linear guide rails

Label saver, shaped profile, technopolymer, stainless steel

GUIDE PROFILE

Polyethylene based (HMWPE) technopolymer, natural colour.

BRACKET

AISI 304 stainless steel.

FEATURES AND APPLICATIONS

The GLT side guide is used to laterally guide products with good stability (Fig.1) on the conveyor belts, without leaving traces on the containers.

Generally used in situations where you want to avoid tearing product labels.

High molecular weight polyethylene (HMWPE) has a high wear resistance; it is particularly suitable for high-speed movements due to its low coefficient of friction.

Supplied in bars of 1500 or 3000 mm length.

ACCESSORIES ON REQUEST

Guide rail clamps: MPG-T, MPG-2T, MPG-T-S.
