

Folding Handles

Steel / Stainless Steel

SPECIFICATION

Type

- Type **A**: With countersunk holes

Steel

- Zinc plated, blue passivated **ST**
- Powder coated
Black, RAL 9005, textured finish **STSW**

Stainless steel AISI 304 NI

Plain finish

INFORMATION

Folding handles GN 3136 are used for pulling out drawers or lifting boxes and containers. When in use, the swivel handle strikes the sheet metal housing at around 90° and then returns to its rest position by gravity.

Due to the simple design, the stamped and bent parts can have larger tolerances. Appropriate compensation measures should therefore be considered in the design.
