INFORMATION

Cabinet U-handles GN 426.5 can be mounted from the back (type A) as well as from the operator's side (type B). In this case the stud is first screwed in from the machine side and then the handle is pushed on and secured with the grub screw.

Both mounting methods allow the mounting of a pair of handles in opposite position. This method could be used e.g. on doors (double handle). In general, a mounting stud with special length l_2 might be required.
