

Spring Latches

**Zinc Die Casting / Plunger Pin Steel,
with Flange for Surface Mounting**

SPECIFICATION

Types

- Type **S**: with locking, without rest position
- Type **L1**: Locking / Rest position via counterclockwise rotation
- Type **R1**: Locking / Rest position via clockwise rotation

Guide

Zinc die casting
plastic coated, RAL 9005, textured finish

Plunger pin

Steel
zinc plated, blue passivated

Spring

Stainless Steel AISI 301

Latch lever

Plastic, Technopolymer (Polyamide PA)

- black, matte
- not removable

INFORMATION

The plunger of spring latches GN 416 is operated by an axial pulling of the latch lever. This kind of operation from the top side is advantageous in certain installation situations.

The pins of Type S spring latches are engaged in the housing to prevent rotation, and therefore lock in the starting position but not the retracted position. Types R1 and L1 spring latches offer a locking function in the starting as well as in the retracted position, preventing an unintentional operation. A lock notch holds the latch lever in both positions.

The adjustment range is designed in such a way that ISO 7092 washers can be used within the adjustment slot in the housing.

TECHNICAL INFORMATION

- ISO-Fundamental Tolerances (see page A21)
- Stainless Steel characteristics (see page A26)
