

## Tubular Handles

**Stainless Steel, Mounting from Operator's Side**

### SPECIFICATION

#### Types

- Type **K**: With plastic cover
- Type **E**: With stainless steel cover cap

#### Handle tube

Stainless steel AISI 304, wall thickness 1,5 mm  
Matte shiny finish, ground

#### Handle legs

Stainless steel AISI 304  
Matte shiny finish, ground

#### Covers

- Plastic, thermoplastic elastomer (TPE)  
Black, matte finish for type K
- Stainless steel AISI 304 for type E

#### Fastening set

- Stainless steel AISI 304
- Mounting stud with threaded pin DIN 913-M8
  - Grub screw DIN 914-M5

### INFORMATION

For a mounting of tubular handles GN 666.7 (mounting from operator's side) the stud is first screwed in from the machine side with the threaded pin DIN 913-M8x25 (included) and then the handle is pushed on and secured with the grub screw DIN 914-M5.

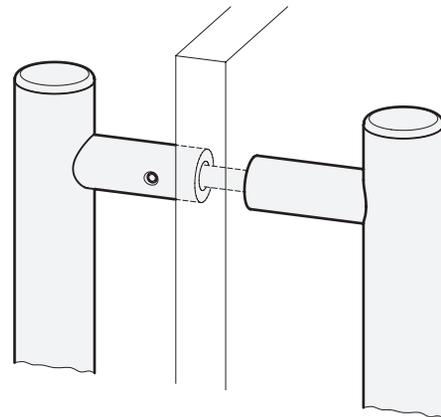

Type E of tubular handles GN 666.7 is completely made of A2 stainless steel.

### ON REQUEST

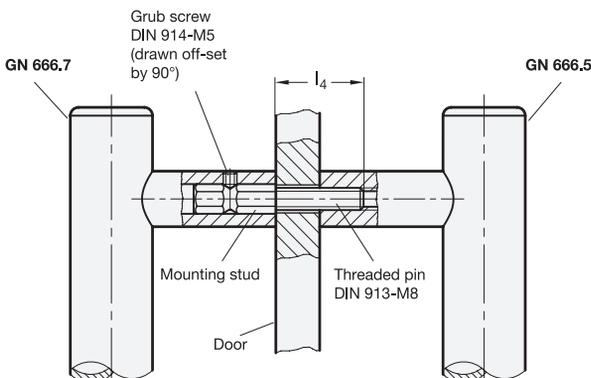

- Special lengths

### TECHNICAL INFORMATION

- Example of application (see page )
- Load Rating Information (see page A35)
- Plastic Characteristics (see page A2)
- Stainless Steel Characteristics (see page A26)

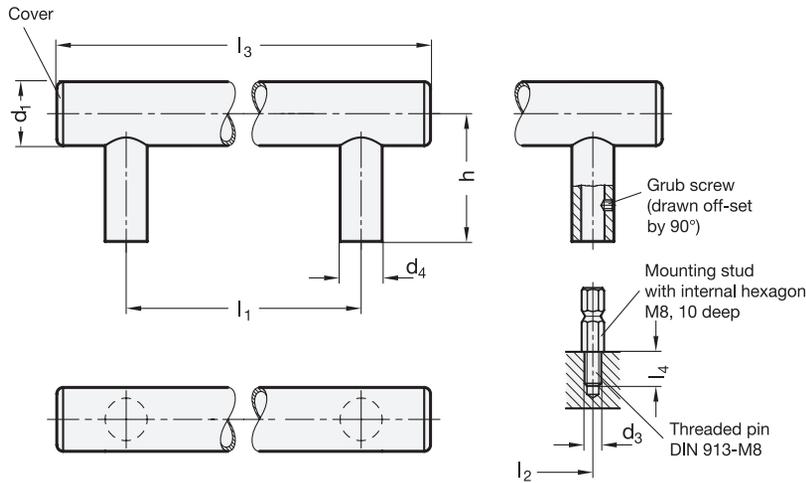

### Example of application

Tubular handles GN 666.7 allow the mounting of a pair of handles in opposite position. This method could be used on doors (double handle).

Generally a modification of the thread length  $l_4$  is required for this. The included threaded pin DIN 913-M8x25-A2 of the mounting stud needs to be replaced by longer threaded pin, too. Handles with a modified thread length  $l_4$  are available on request.
