

New awards for ELESA design

ETH wins also the Red Dot Design Award 2015

[ETH-AN](#) tubular handle has been awarded with the [Red Dot Award 2015](#) in the "Product design" category.

This award adds to the **IF Design Award 2015** won by ETH-AN and [MPR](#) folding handle with recessed tray and return spring.

With this new recognition now Elesa counts 38 Industrial Design awards conferred since 1977 by the most prestigious International Juries.

ETH-AN tubular handle belongs to Elesa Ergostyle® line that combines well ergonomics, design and functionality.

The tube diameter of 35 mm offers an effective and comfortable grip. The special antirotation assembly system of the tube to the handle shanks has been developed to offer a firm and secure grip during handling, while the absence of edges and protrusions ensures the maximum safety for the operator.

The tubular handle can be supplied with side caps in six Ergostyle colours with glossy finish.

MPR folding handle with recessed tray and return spring in polyamide based technopolymer is equipped with stainless steel return springs from work to rest position. The special design has been studied to ensure a high resistance to lifting and tensile strength, in addition to a more comfortable grip.

Product technical data sheets, along with drawings and tables with codes and dimensions, are available on the website www.elesa-ganter.com.
