

# Elesa+Ganter Design Awards

GN 126

GN 328

GN 428

**Three standard parts, three design awards** - In addition to receiving the iF DESIGN AWARD, Elesa+Ganter has also been given the prestigious Red Dot Award for outstanding design.

Industrial design not only makes products more appealing to the eye, it also enhances their value as a whole. Design optimizes ergonomics and functionality, which Elesa+Ganter shows its GN 126 adjustable flat tension levers and its GN 328 cabinet „U“ handles and GN 428 machine handles.

Thanks to their modern form, these standard elements are ideally suited to the appearance of modern machines and systems. In this way, details such as handles and levers can be implemented with the same high level of design as the machine itself, regardless of the batch size. The option of customizing size or color in a simple yet cost-effective manner further enhances the possibilities for use. Internal recessed grips and exact edge rounding ensure noticeably improved ergonomics.

The fact that Elesa+Ganter has chosen the right partner in design agency Corpus-C in Fürth is demonstrated by the awards received from three independent juries:

The flat adjustable tension levers GN 126 received the iF Design Award and the German Design Winner Award 2019. The Cabinet „U“ handles GN 328 and GN 428 also received the coveted Red Dot Award and the German Design Special Award 2019.

The GN 126 adjustable flat tension levers are characterized by their dynamic shape, produced by zinc die-casting and finished with a plastic coating and are ideal wherever pivoting ranges are limited. The integrated serration allows for the position of the handle to be adjusted without having to loosen it. If required, the same GN 126.1 shape is available with a completely stainless steel interior.

The GN 328 and GN 428 cabinet „U“ handles and machine handles are made of cast aluminium or a bent aluminium profile and are also available with different surface finishes. For applications in particularly corrosive environments, the GN 328.5 cabinet „U“ handles are also available in stainless A4 precision cast stainless steel.
