Elesa+Ganter always strive to be attentive and adhere to customer needs.

CFSW. hinges with built-in safety multiple switch and the complementary **CFMW. hinges**, already available in black colour, have also been introduced in **grey RAL 7040 (C33)**. This particular grey tonality has been chosen from the R&D department to offer an alternative for designers. Keeping a consistent **colour match** between components can be important, especially when using aluminium structures. Both colour schemes share the same quality, mechanical features and reliability.

- **Safety switches:** different combinations of contacts with positive opening.
- **Approved by IMQ and UL.**
- **Double insulation:** thanks to the SUPER-technopolymer housing, the hinge guarantees the double insulation of the internal circuits, therefore there is no need of grounding connection.
- **High mechanical strength:** life-span over 1 million operating cycles.
- **Corrosion resistance:** protection class IP67 withstanding water jets washings.
- **Easy installation** on different types of profile systems with or without slots.
- **Quick assembly** by means of 4 screws (front or back side).
- **Tamper-proof** thanks to the special covers of the mounting screws.

The CFSW., coupled with its complementary mechanical hinge CFMW. represents a complete system combining safety and style.

Products technical data sheets, along with drawings and tables with codes and dimensions, are available on our website www.elesa-ganter.com.
