

GRADUATIONS

Graduations for control knobs

Graduations can be laser-engraved on the plain surface of the control knobs and on plain flanges with high-precision and perfect readability. The graduations, consisting of marks and numbers, are available as indicated in the diagram here below.

All the graduations are available for minimum quantities that depend on the size of the knob and on the type of graduation chosen. These quantities are determined during the quotation analysis.

Graduations can be engraved on the following elements:

- IZP. (see page 419)
- F.N (see page 425)
- GN 726.1 (see page 417)
- GN 726.2 (see page 418)
- GN 736.1 (see page 431)
- GN 200 (see page 435)
- GN 700 (see page 438)
- GN 164 (see page 415)

To create graduations on other elements, special graduations, symbols or personalisations, please contact the ELESA+GANTER sales departments.

Order information example
